Rights, Restitution, and Risk Apr 24 2020 Moral theory should be simple: the moral theorist attends to ordinary human action to explain what makes some acts right and others wrong, and we need no microscope to observe a human act. Yet no moral theory that is simple captures all of the morally relevant facts. In a set of vivid examples, stories, and cases Judith Thomson shows just how wide an array of moral considerations bears on all but the simplest of problems. She is a philosophical analyst of the highest caliber who can tease a multitude of implications out of the story of a mere bit of eavesdropping. She is also a master teller of tales which have a philosophical bite. Beyond these pleasures, however, she brings new depth of understanding to some of the most pressing moral issues of the moment, notably abortion. Thomson's essays determinedly confront the most difficult questions: What is it to have a moral right to life, or any other right? What is the relation between the infringement of such rights and restitution? How is rights theory to deal with the imposition of risk?

Public Procurement and Human Rights Nov 24 2022 This timely work reflects on the role and obligations of the state as a buyer of goods and services, from the dual disciplinary perspectives of public procurement and human rights. Through theoretical and doctrinal analyses, and practice-focused case studies, it interrogates the evolving character of public procurement as an interface for multiple normative regimes and competing policies. Challenging the prevailing paradigm which subordinates human rights to narrowly-defined economic goals, insightful contributions advance a compelling case for greater inter-disciplinarity and policy coherence as crucial to realising international policies such as those embodied in the UN Guiding Principles on Business and Human Rights and 2030 Sustainable Development Goals.

Principles for Responsible Contracts Sep 29 2020 This publication feeds into ongoing global efforts to better align the international investment regime with international human rights standards. It focuses on contracts between State entities and foreign business investors that govern big investment projects, such as natural resource exploitation or big agricultural and infrastructure projects. It provides practical guidance to the negotiators of such contracts, be they government, investor or legal representatives, on how to integrate the management of human rights risks in their contract negotiations. Applying the principles for responsible contracts to the negotiation of contracts enables human rights-related risks to be identified early and managed, which, in turn, will contribute to making the project more sustainable.

Protecting Human Rights Defenders at Risk Jan 14 2022 This book assesses the construction, operation and effects of the international protection regime for human rights defenders, which has evolved significantly over the last twenty years in response to the risks people face as they promote and protect human rights. Drawing upon the experiences of human rights defenders who continue to persevere in their activism in Indonesia, Egypt, Kenya, Mexico and Colombia, this edited collection examines the ways in which formal protection mechanisms by state and civil society actors intersect with self-protection measures and informal protection initiatives by families and friends. It highlights that protection practices are most effective when they are designed to address the specific risks that human rights defenders face (which are gendered and intersectional); reflect how defenders understand 'risk', 'security' and 'protection'; and are appropriate for the dynamic sociopolitical and legal contexts in which defenders operate. This book proposes ways in which the protection of human rights defenders at risk should be reimagined and practised. This book will be a thought-provoking guide for students and scholars of politics, international relations, law and human rights, as well as to practitioners engaged in the protection of human rights defenders at risk.

Justice and Security in the 21st Century Sep 10 2021 This book examines the question of whether justice or security is the primary virtue of 21st-century society. The issue of enhancing security without undermining justice - managing risk without undermining the rule of law - has always been problematic. However, recent developments such as new counter-terrorism measures, the expanding scope of criminal law, harsher migration control and an increasingly pronounced concern with public safety, have posed new challenges. The key element of these contemporary challenges is that of membership and exclusion: that is, who is to be included within the community of justice, and against whom is the just community aiming to defend itself? Justice and Security in the 21st Century brings together researchers from various academic disciplines and different countries in order to explore these developments. It attempts to chart the complex landscapes of justice, human rights and the rule of law in an era when such ideals are challenged by increasing demands for efficiency, effectiveness, public safety and security. This edited volume will be of much interest to students of critical legal studies, criminology, critical security studies, human rights, sociology and IR in general.

Human Rights and Risks in the Digital Era: Globalization and the Effects of Information Technologies Mar 16 2022 Globalization, along with its digital and information communication technology counterparts, including the Internet and cyberspace, may signify a whole new era for human rights, characterized by new tensions, challenges, and risks for human rights, as well as new opportunities. Human Rights and Risks in the Digital Era: Globalization and the Effects of Information Technologies explores the emergence and evolution of 'digital' rights that challenge and transform more traditional legal, political, and historical understandings of human rights. Academic and legal scholars will explore individual, national, and international democratic dilemmas--sparked by economic and environmental crises, media culture, data collection,

privatization, surveillance, and security--that alter the way individuals and societies think about, regulate, and protect rights when faced with new challenges and threats. The book not only uncovers emerging changes in discussions of human rights, it proposes legal remedies and public policies to mitigate the challenges posed by new technologies and globalization.

Canadian Child Health Law Dec 21 2019 This book is the first analysis of the law in Canada pertaining to the health of children. It reflects the collaborative effort and concern of four national centres - Centre de recherche en droit public; Canadian Research Institute for Law and the Family; Canadian Institute of Child Health; and the Canadian Human Rights Foundation. The book begins with a factual picture of the health of Canadian children - the causes of disability, injury and death, the types of programs and policies in place and the success of such programs. It then examines the impact of public international law as it applies to the right to health generally and the implications of its interpretation for the right to health under the Convention and under current Canadian constitutional and criminal law. The possible recourse to the Convention for a positive or restrictive interpretation of this right under the common law of Canada or the civil law of Quebec are the focus of separate chapters. The final chapter is a discussion of the difficult question of research involving children.

Rights, Risks and Responsibilities Oct 31 2020 Taking an interprofessional focus to reflect modern practice, this book introduces the complexity of balancing rights and risks. It helps readers to understand and evaluate their own values, knowledge and power in order to provide safer, more effective care for those they work with, including vulnerable adults and children.

Contemporary Risk Assessment in Safeguarding Children Dec 13 2021 This book is for anyone involved in the protection and safeguarding of children and young people. At all levels, risk and risk assessment are key concerns and preoccupations. Yet, across and within the various concerned professional groups, there is an inadequate knowledge base to inform practice. There is no official guidance, not even a shared agreement on what 'risk' means. The book's varied and illuminating perspectives help refine the exercise of professional judgement in estimating and managing uncertainties prospectively, rather than being judged retrospectively. It will direct professional progress towards risk assessments that are evidence-based, comprehensive, and equitable; risk management strategies with levels of intrusion commensurate to levels of risk; and greater shared understanding of terminology. Contemporary Risk Assessment in Safeguarding Children also examines dilemmas in daily decision-making, considering how lack of guidance leads to inconsistency and how differences in approach cause tension and confusion. It examines emerging dilemmas around rights, protection, and responsibilities; and offers some contemporary risk assessment frameworks.

Children in the Online World Jun 19 2022 What is online risk? How can we best protect children from it? Who should be responsible for this protection? Is all protection good? Can Internet users trust the industry? These and other fundamental questions are discussed in this book. Beginning with the premise that the political and democratic processes in a society are affected by the way in which that society defines and perceives risks, Children in the Online World offers insights into the contemporary regulation of online risk for children (including teens), examining the questions of whether such regulation is legitimate and whether it does in fact result in the sacrifice of certain fundamental human rights. The book draws on representative studies with European children concerning their actual online risk experiences as well as an extensive review of regulatory rationales in the European Union, to contend that the institutions of the western European welfare states charged with protecting children have changed fundamentally, at the cost of the level of security that they provide. In consequence, children at once have more rights with regard to their personal decision

making as digital consumers, yet fewer democratic rights to participation and protection as 'digital citizens'. A theoretically informed, yet empirically grounded study of the relationship between core democratic values and the duty to protect young people in the media-sphere, *Children in the Online World* will appeal to scholars and students across the social sciences with interests in new technologies, risk and the sociology of childhood and youth.

Human Rights at Risk Mar 24 2020 *Human Rights at Risk* brings together social scientists, legal scholars, and humanities scholars to analyze the policy challenges of human rights protection in the twenty-first century. The volume is organized based on three overarching themes that highlight the challenges and risks in international human rights: international institutions and global governance of human rights; thematic blind spots in human rights protection; and the human rights challenges of the United States as a global and domestic actor amidst the contemporary global shifts to authoritarianism and illiberal populism. One of the very few books that offer new perspectives that envision the future of transnational human rights norms and human dignity from a multidisciplinary perspective, *Human Rights at Risk* comprehensively examines the causes and consequences of the challenges faced by international human rights. Managing Human Rights as Risks, the United Nations Guiding Principles for Business and Human Rights and the Future of Corporate Social Responsibility Feb 27 2023 Whereas businesses tend to view all things in terms of risk and return, some elements of human rights that are integral to human dignity do not lend themselves to this characterization. In the story of the progressive detachment of the economic sphere from society drawn by Polanyi (1944), human rights would still provide a limit, if only theoretical, to the growth of the market sphere which gives an exchange value to everything. But if we try to re-embed the economy in society by making human rights part of the norms businesses should apply, is there not a danger of seeing human rights become another element to be subjected to calculations and integrated into economic rationality, their value thus reduced by being but a means for profit-maximization? The UNGP, well-aware of the difference between the two rationalities we have identified, recognizes the possibility of integrating them both in the same risk management devices as long as their logics remain distinct. But we claim that this distinction does not hold in practice and cannot take us beyond the prioritization of some human rights violations. Risks are endowed with a positivity that calls for their optimization, not their complete suppression, hence the paradox of a soft law tool that cannot but perpetuate human rights violations even if through the reduction of their most damaging examples. We explore this tension through the study of human rights risk assessments tools and of the combination of different strands of risk management inside one company. By the same token we deepen the connection between the "business and human rights" and the "sustainable procurement" fields.
