Life-span Development Dec 01 2020 This thorough revision of the highly successful first edition of Life-Span Development offers the reader a wide-ranging and thought provoking account of human development throughout the lifespan. The lifespan approach emphasises that development does not stop when we cease to be adolescents but goes on throughout adulthood and into old age. In initial chapters Leonie Sugarman outlines the issues surrounding the notion of development and how it can be studied, including reviews of the work of key theorists Erikson, Levinson and Gould. She goes on to consider the different ways in which the life course can be construed: as a series of age-related stages; as a cumulative sequence; as a series of developmental tasks; as a series of key life events and transitions or as a narrative construction which creates a sense of dynamic continuity. A final chapter looks at how people cope, the resources that are available and the theoretical and practical issues regarding interventions to assist them in the process. New to this edition is increased coverage of the topical issue of successful ageing and a new chapter on the increasingly popular narrative approach to lifespan development. This edition is also more student-friendly with exercises in self-reflection that encourage the reader to look at the development of their own lives or those of their current or future clients. Boxed material highlighting major theories and clarifying concepts is also included. This book will be invaluable for students of developmental and occupational psychology and professionals in the fields of health management, education and social

work.

Chuck Leader, LtCol USMC (Ret.) and information technology company CEO; "A Winning Combination," Marine Corps Gazette, March 2005. Certain to Win [Sun Tzu's prognosis for generals who follow his advice] develops

the strategy of the late US Air Force Colonel John R. Boyd for the world of business. The success of Robert Coram's monumental biography, *Boyd, the Fighter Pilot Who Changed the Art of War*, rekindled interest in this obscure pilot and documented his influence on military matters ranging from his early work on fighter tactics to the USMC's maneuver warfare doctrine to the planning for Operation Desert Storm. Unfortunately Boyd's written legacy, consisting of a single paper and a four-set cycle of briefings, addresses strategy only in war. [All of Boyd's briefings are available on Defense and the National Interest.] Boyd and Business Boyd did study business. He read everything he could find on the Toyota Production System and came to consider it as an implementation of ideas similar to his own. He took business into account when he formulated the final version of his "OODA loop" and in his last major briefing, *Conceptual Spiral*, on science and technology. He read and commented on early drafts of this manuscript, but he never wrote on how business could operate more profitably by using his ideas. Other writers and business strategists have taken up the challenge, introducing Boyd's concepts and suggesting applications to business. Keith Hammonds, in the magazine *Fast Company*, George Stalk and Tom Hout in *Competing Against Time*, and Tom Peters most recently in *Re-imagine!* have described the OODA loop and its effects on competitors. They made significant contributions. Successful businesses, though, don't concentrate on affecting competitors but on enticing customers. You could apply Boyd all you wanted to competitors, but unless this somehow caused customers to buy your products and services, you've wasted time and money. If this were all there were to Boyd, he would rate at most a sidebar in business strategy. Business is not War Part of the problem has been Boyd's focus on war, where "affecting competitors" is the whole idea. Armed conflict was his life for nearly 50 years, first as a fighter pilot, then as a tactician and an instructor of fighter pilots, and after his retirement, as a military philosopher. Coram describes (and I know from personal experience) how his quest consumed Boyd virtually every waking hour. It was not a monastic existence, though, since John was above everything else a competitor

and loved to argue over beer and cigars far into the night. During most of the 1970s and 80s he worked at the Pentagon, where he could share ideas and debate with other strategists and practitioners of the art of war. The result was the remarkable synthesis we know as *Patterns of Conflict*. Discussions about generals and campaigns, however, did not give Boyd much insight into competition in other areas,

*One Enchanted Christmas* Dec 13 2021 He's betting on love... Margaret Stockwick is still mourning the loss of her beloved parents when her brother whisks her away from the family estate. Unbeknownst to Meg, Hector has no plans to allow her to return. Instead, he'll see her ensconced in London after the Christmas season to be married off as quickly as possible, thereby relieving himself of any further responsibility for her welfare. Meg is devastated; not only by her brother's betrayal, but at the prospect of spending the holidays with his best friend, the roguish Lord Clement. Otis spends nearly all his days at his family's estate, the better to protect his mother and siblings. But his greatest wish is to remove them from beneath the thumb of his scheming father. Then Lord Vyne presents a wager—marry in three months, and Otis can win a bit of freedom for his family. It's a gamble Otis intends to win. But not with the chit his father's chosen, an arrangement based on financial gain. No. Otis is determined to marry for love and mutual respect...and it isn't long before he finds the lovely Meg inspiring both. **Why Lyrics Last** Sep 29 2020 Argues that lyric making is universal across cultures, and uses the example of Shakespeare's "Sonnets" to showcase the human disposition to play with lyrical patterns.

**The Forgotten Pollinators** Jun 26 2020 Consider this: Without interaction between animals and flowering plants, the seeds and fruits that make up nearly eighty percent of the human diet would not exist. In *The Forgotten Pollinators*, Stephen L. Buchmann, one of the world's leading authorities on bees and pollination, and Gary Paul Nabhan, award-winning writer and renowned crop ecologist, explore the vital but little-appreciated relationship between plants and the animals they depend on for reproduction -- bees, beetles, butterflies, hummingbirds, moths, bats, and countless other animals, some widely recognized and other almost unknown. Scenes from around the globe -- examining island flora and fauna on the Galapagos, counting bees in the Panamanian rain forest, witnessing an ancient honey-hunting ritual in Malaysia -- bring to life the hidden relationships between plants and animals, and demonstrate the ways in which human society affects and is affected by those

relationships. Buchmann and Nabhan combine vignettes from the field with expository discussions of ecology, botany, and crop science to present a lively and fascinating account of the ecological and cultural context of plant-pollinator relationships. More than any other natural process, plant-pollinator relationships offer vivid examples of the connections between endangered species and threatened habitats. The authors explain how human-induced changes in pollinator populations -- caused by overuse of chemical pesticides, unbridled development, and conversion of natural areas into monocultural cropland -- can have a ripple effect on disparate species, ultimately leading to a "cascade of linked extinctions."

**Cathedral of the Wild** Jan 22 2020 "This is a gorgeous, lyrical, hilarious, important book. . . . Read this and you may find yourself instinctively beginning to heal old wounds: in yourself, in others, and just maybe in the cathedral of the wild that is our true home."—Martha Beck, author of *Finding Your Own North Star* Boyd Varty had an unconventional upbringing. He grew up on Londolozi Game Reserve in South Africa, a place where man and nature strive for balance, where perils exist alongside wonders. Founded more than eighty years ago as a hunting ground, Londolozi was transformed into a nature reserve beginning in 1973 by Varty's father and uncle, visionaries of the restoration movement. But it wasn't just a sanctuary for the animals; it was also a place for ravaged land to flourish again and for the human

spirit to be restored. When Nelson Mandela was released after twenty-seven years of imprisonment, he came to the reserve to recover. Cathedral of the Wild is Varty's memoir of his life in this exquisite and vast refuge. At Londolozi, Varty gained the confidence that emerges from living in Africa. "We came out strong and largely unafraid of life," he writes, "with the full knowledge of its dangers." It was there that young Boyd and his equally adventurous sister learned to track animals, raised leopard and lion cubs, followed their larger-than-life uncle on his many adventures filming wildlife, and became one with the land. Varty survived a harrowing black mamba encounter, a debilitating bout with malaria, even a vicious crocodile attack, but his biggest challenge was a personal crisis of purpose. An intense spiritual quest takes him across the globe and back again—to reconnect with nature and "rediscover the track." Cathedral of the Wild is a story of transformation that inspires a great appreciation for the beauty and order of the natural world. With conviction, hope, and humor, Varty makes a passionate claim for the power of the wild to restore the human spirit. Praise for Cathedral of the Wild "Extremely touching . . . a book about growth and hope."—The New York Times "It made me cry with its hard-won truths about human and animal nature. . . . Both funny and deeply moving, this book belongs on the shelf of everyone who seeks healing in wilderness."—BookPage

**On the Origin of Stories** Mar 04 2021 Brian Boyd explains why we tell stories and how our minds are shaped to understand them. After considering art as adaptation, Boyd examines Homer's *Odyssey* and Dr. Seuss's *Horton Hears a Who!* demonstrating how an evolutionary lens can offer new understanding and appreciation of specific works. Published for the bicentenary of Darwin's birth and the 150th anniversary of the publication of *Origin of Species*, Boyd's study embraces a Darwinian view of human nature and art, and offers a credo for a new humanism.
